DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to a method for generating and forwarding a request packet, classified in class 705, subclass 26.
- II. Claims 10-20, drawn to a method for anonymous fulfillment of a package, classified in class 705, subclass 26.
- III. Claims 21-25, drawn to a method of fulfilling a request using a delivery procedure based on a user profile, classified in class 705, subclass 26.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a method for generating and forwarding a request packet that does not require the anonymous fulfillment of invention II. See MPEP § 806.05(d).

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a method for generating and forwarding a request packet that does not require the delivery procedure of invention III. See MPEP § 806.05(d).
